01

**Standard &
Custom
Rubber
Parts**

02

**Rubber
mountings**

03

**Rubber
Seals**

04

Couplings

05

**Plastic
products**

A collage of various custom rubber products. On the left, there's a collection of small, diverse parts like O-rings, gaskets, and specialized seals. In the top center, a large roll of black rubber sheeting is shown. Below it, two rectangular rubber profiles with internal channels are displayed. To the right of these, three dark rounded rectangles contain the text 'Custom Shapes & Sizes', 'Excellent Elasticity', and 'Industrial Grade Material' respectively. Further right, another roll of corrugated rubber is visible. At the bottom center, a curved rubber hose with internal braiding is shown. On the bottom right, several rectangular blocks of rubber are stacked. The background is a light, neutral color.

Custom Rubber Products

Sealing Profiles • Anti-Vibration Pads • Molded Rubber Parts

- Custom Shapes & Sizes
- Excellent Elasticity
- Industrial Grade Material

For Automotive, Machinery, Construction & Industrial Applications

A collage of various custom rubber products. On the left, there's a collection of small, diverse parts like O-rings, gaskets, and specialized seals. In the top center, a large roll of black rubber sheet is shown. Below it, two rectangular rubber profiles with internal channels are displayed. To the right, a corrugated rubber hose is coiled. At the bottom center, a thick rubber hose with multiple internal braided layers is shown. On the bottom right, several rectangular rubber blocks of different sizes are stacked. The background is a light, neutral color.

Custom Rubber Products

Sealing Profiles • Anti-Vibration Pads • Molded Rubber Parts

- Custom Shapes & Sizes
- Excellent Elasticity
- Industrial Grade Material

For Automotive, Machinery, Construction & Industrial Applications

RUBBER MOUNTINGS

Vibration Isolation & Shock Absorption

Structure

Rubber body, metal sleeve, flange plate, threaded stud

Materials

NR, NBR, EPDM, Silicone

Properties

Shock absorption, noise reduction, oil resistance, weather resistance, durable

Applications

Generator sets, construction machinery, vehicles, marine equipment, industrial pumps

Custom designs and OEM orders available

SEALING RINGS & RUBBER SEALS

O-Rings / Oil Seals / PTFE Washers / V-Seals / Rubber Cords

Structure

O-ring, oil seal lip, metal casing, PTFE washer, V-seal, rubber cord

Materials

NBR, EPDM, FKM, PTFE, silicone rubber

Properties

Excellent sealing, oil resistance, heat resistance, wear resistance, low friction, good elasticity

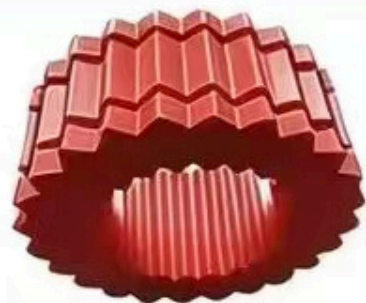

Applications

Hydraulic systems, pumps, valves, automotive engines, industrial machinery

Custom sizes, colors and OEM orders available

COUPLING ELEMENTS & ELASTOMERS

Power Transmission, Vibration Dampening & Misalignment Compensation

H-TYPE COUPLING SLEEVE

HS-TYPE COUPLING SLEEVE

J-TYPE COUPLING SLEEVE

E-TYPE COUPLING SLEEVE

Gear Coupling Hub

HRC Coupling Elastomer

FCL Coupling Elastomer

NM Coupling Elastomer

NOR-MEX Coupling Elastomer

GR Coupling Elastomer

L Coupling Elastomer

H Type Coupling Elastomer

Structure

Coupling sleeve, elastomer hub, spider insert, gear coupling, rubber cushion, locking element.

Materials

Rubber, PU,

Properties

High torque transmission, vibration damping, wear resistance, oil resistant.

Applications

Pumps, compressors, conveyors, generators, machine tools, industrial drives.

Flexible Shaft Couplings for Power Transmission

Coupling Rubber Elements

✓ High Torque Transmission

✓ Vibration Damping

✓ Easy Installation

For Pumps, Compressors, Conveyors, Generators & Industrial Equipment

Engineering Plastic Parts Collection

PU washers, POM bushings, plastic gears, guide rails and custom molded industrial components.
